

Biowaste

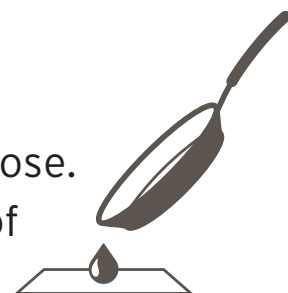

*Thank you
for sorting
your waste!*

Your biowaste bag will last longer if you

1. Drain liquids. Let the waste mass cool and dry for a while before putting it into the bag.
2. Rip an egg carton into pieces and put them in the bottom of the bag.
3. Place the bag in an airy spot.

- ✓ Put your biowaste preferably in a paper bag. You cannot use a normal plastic bag - it won't decompose.
- ✓ Let cooking oil and other liquid fats soak into a piece of paper » into biowaste.

Give biowaste a new life » Biowaste to recycling

Not into the biowaste container:

plastic bags and packages, glass, metal, diapers, hygiene products.

Plastic bags » into the plastic package collection

Glass jars » into the glass package collection

Cigarette butts » into mixed waste
